

custom Quantity

Job specifications don't always justify purchasing full unit quantities of hardwood plywood, particularly when the job calls for premium, architectural grade panels. With States Industries new custom quantities program, you have the ability to tailor your order to the specific project size.

All of States' product lines are available in quantities as small as 5 pieces for clear finished or unfinished product and 30 pieces of two sided custom color, or 60 pieces, one sided.

Custom Quantities for the
Perfect Number of Panels.

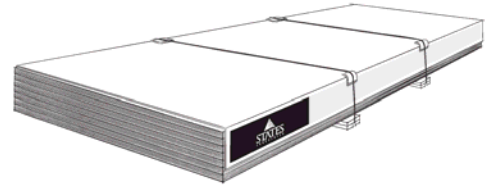

custom Quantity

JOB LOT SIZED ORDER QUANTITIES

Ingenuity, it's in everything we do.

States Custom Quantity (CQ) process allows us to manufacture as few as 5 panels at a time, and even apply clear finish at that quantity. Color finishes are available on as few as 30 panels when finished on two sides, or 60 one sided.

Although CQ focuses on premium architectural panels, all face and back species, grades and cores are available, including UpFront crossgrain veneers and Versa melamine paper backs.

20 BELOW

Unfinished panels, or NOVA® clear finished panels may be ordered in as few as 5 panel quantities. Pricing is based on volumes.

30 ABOVE

NOVA® Custom color matched panels require at least 30 two sided finished panels or 60 one sided finished panels. Custom colors typically require prototyping at a flat rate charge.

Environmental

As with most States' products, CQ panels are generally available in FSC Certified and in No-Added-Formaldehyde formats.

Lead Times

CQ will be produced in our normal two week lead times. Special face veneer species or grades may require additional time to source

HPVA Standards

CQ will be manufactured to ANSI/HPVA HP-1-2004 standards and may include up to 15% shop.
