

Versa

States Industries now offers Versa — hardwood panels with thermofused melamine backs. The panels are available in most domestic and select import species. Versa panels bring together natural hardwood exteriors and durable synthetic interiors that can be easily cleaned. This versatile combination makes them perfect for the construction of cabinets and closets. We have selected six popular melamine patterns for our initial offering. Other colors and patterns are available by special order.

Versa Melamine/Hardwood Panels
for Convenience and Beauty.

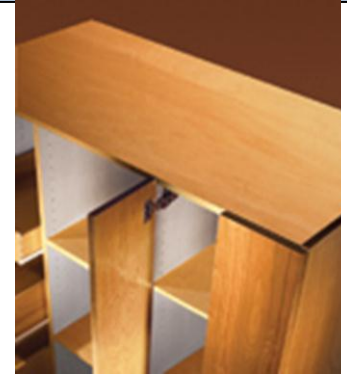

Versa

Ingenuity, it's in everything we do.

States Industries now offers Versa panels with most domestic and selected imported hardwood faces and thermofused melamine backs. Typically used to construct cabinets and closets, this versatile combination provides premium hardwood exteriors and durable, wipe down interiors. We have selected six popular melamine patterns for this initial offering. Other colors and patterns are available on a special order basis.

Thickness and Core Constructions

Versa panels are available from 1/2" through 1 1/4" with ArmorCore®, MDF or Particleboard cores. Fire Rated MDF or Particleboard and FSC Certified constructions are also available.

Melamine cabinet interiors with natural hardwood exteriors give consumers the best of both worlds.

Applications

These panels are typically used to construct kitchen cabinets with durable and mar and moisture resistant melamine interior surfaces and beautiful natural wood veneered exteriors. Versa panels are appropriate anywhere the secondary surface benefits from a fully sealed, moisture resistant coating. Patterns include opaque colors as well as popular wood grains. See the front of this sheet for available patterns.

NOVA Prefinishing

States' Versa panels can be supplied with our trademarked NOVA® finishes on the wood veneered side. NOVA finishes are UV Cured, 100% solids and emit no VOC's in manufacturing or in use. Clear topcoats, as well as custom color matches may be applied to Versa panels.

Environmental Options

All States Industries panels, including Versa comply with California Air Resources Board (CARB) 93120. Versa panels may be specified with no added urea formaldehyde resins to comply with The US Green Building Council's LEED IEQ Credit 4.4: Low Emitting Materials – Composite Wood and Agrifiber Products. Panels prefinished with NOVA UV cured topcoats may also qualify for LEED Credit 4.2: Low Emitting Materials – Paints and Coatings. Versa panels may also be specified as Forest Stewardship Council Certified and as such will contribute to LEED MR Credit 7: Certified Wood.
