

Drawer Sides

Componability™

Improve Productivity and Reduce Expenses

Pre-fabricated drawer sides from States Industries eliminate labor-intensive steps, increasing your productivity and lowering your costs. Drawer box construction takes one-third the time of scratch-built drawers. Each item is precision engineered for consistency in fabrication when it arrives on your shop floor. This precision reduces waste and assures you a simpler bidding process with clearly defined prices.

All drawer side orders are custom. Drawer sides are available in a range of options and are manufactured to meet the exacting specifications of each unique application or project.

Packaged 10 drawer sides per box or in bulk packaging

Drawer Sides

Pre-Fabricated

Buying small quantities of drawer sides instead of units of panel goods means you can afford to offer value-added features while creating unique and profitable finished products.

When ordering drawer sides, specify NOVA UV-cured finishes to avoid finishing altogether or direct your finishing labor to more critical areas. NOVA finishes are durable and beautiful.

Purchasing pre-fabricated drawer sides allows you to focus on the processes where you are most efficient. It also provides you with fixed costs for those outsourced parts and increases your productivity.

Fully Customizable

All drawer sides are custom. No matter your budget, our integrated manufacturing process enables us to tailor drawer sides for your unique application and project.

We can build one or as many drawer sides as you need. They are available edge banded or bullnosed and with or without a kerf for a drawer

bottom. Cores include veneer, ApplePly® and Baltic birch. Maple, oak, cherry and birch veneers may be selected, as well as a combination of maple and aromatic cedar.

All drawer sides are prefinished with the exception of the aromatic cedar veneers. Prefinished, solid white maple drawer sides are also available.

Premium Solid Maple drawer sides are handcrafted of solid North American Maple that has been graded for color uniformity and blemish-free appearance.

ApplePly drawer sides feature 9-ply, two-step construction that offers the assurance of clean dovetails, stronger doweled joints and smoother dados than conventional plywood. They are Forest Stewardship Council® certified and free of urea-formaldehyde resins.

Veneer Core drawer sides may be laminated in one step for maximum economy or constructed and sanded to a metered tolerance. These drawer sides are lightweight, high in dimensional stability and bending strength and hold screws better than most other substrates.

Baltic Birch drawer sides offer a combination of strength and aesthetics at a price point suited to all budgets. These drawer sides feature 9 plies of birch that are virtually void free and offer stability, strength and excellent machining properties.

Melamine drawer sides offer a clean, modern look at a lower price point. They are commonly used in cabinet, closet and commercial applications. Melamine drawer sides are available in a variety of colors with particleboard or MDF cores.

Drawer bottoms are also available!
