

Versa

Versa Panels for Convenience and Beauty

States Industries now offers Versa—panels with hardwood face veneers and thermofused melamine backs. The panels are available in most domestic and select import species.

Versa panels bring together natural hardwood exteriors and durable synthetic interiors that can be easily cleaned. This versatile combination makes them perfect for the construction of cabinets and closets.

Versa

Choose from two popular melamine patterns for the back of your Versa panel. Other colors and patterns are available by special order.

Galaxy White Melamine Back

Hard Rock Maple Melamine Back

Melamine cabinet interiors with natural hardwood exteriors

Step 1: Specify Your Face Veneer

There are four key attributes you can specify when choosing the face veneer for your Versa panel:

Wood Species: Primary determinant of color and grain characteristics.

Veneer Cutting: How veneer is cut from a log determines how the grain is presented.

Veneer Matching: How leaves or “flitches” of veneer are assembled to achieve desired pattern and color effects.

Veneer Grading: How much natural variation is allowed.

For more information, see our “Veneer Specification Guide.”

Step 2: Specify Your Melamine Pattern for the Back

Versa panels come with thermofused melamine backs, available in two popular patterns.

Galaxy White Melamine

Hard Rock Maple Melamine

Thickness and Core Construction

Versa panels are available with a 3/4" Particleboard core.

States' hardwood plywood products are certified to meet all requirements established in the EPA's TSCA Title VI 40 CFR Part 770 Formaldehyde Emission Standards for Composite Wood Products regulation. Versa panels may be specified with No-Added-Urea-Formaldehyde (NAUF) resins to comply with The US Green Building Council's LEED IEQ Credit 4.4: Low Emitting Materials – Composite Wood and Agrifiber Products.
