

Wall Paneling

The Warmth and Beauty of Natural Wood

States' wall paneling features natural, finished or unfinished wood veneers. Finished panels utilize our proprietary NOVA ultraviolet-cured coatings, making them as durable and resilient as they are beautiful. We offer 27 distinct styles in 4' X 8' sheets, ranging from 5/32" through 3/8" thick.

Looks range from traditional beaded patterns to contemporary ungrooved panels. In addition to residential applications, these panels are widely used in light commercial and institutional applications, as well as in contemporary offices.
